REVIVING A STARTER

& OTHER HELPFUL INFORMATION

FEEDING YOUR STARTER

Feed your starter once a day if kept at room temperature, or once a week if stored in the fridge.

Ingredients: Use equal parts by weight of flour and water. For example, if you have 50 grams of starter, add 50 grams of flour and 50 grams of water.

Flour: All-purpose or whole wheat flour works well. If your starter is struggling you can use Rye Flour.

Water: Use room-temperature, filtered water for best results.

ROOM TEMPERATURE VS. FRIDGE STORAGE

2.

- Room Temperature: This requires daily feeding and is good if you bake often. Leave the starter covered loosely, allowing it to breathe.
- Fridge Storage: If you bake less frequently, store the starter in the fridge, feeding it weekly. Take it out, feed it, and let it sit at room temperature for a few hours before putting it back in the fridge.

**3.**

DISCARDING

- Room Temperature: This requires daily feeding and is good if you bake often. Leave the starter covered loosely, allowing it to breathe.
- Fridge Storage: If you bake less frequently, store the starter in the fridge, feeding it weekly. Take it out, feed it, and let it sit at room temperature for a few hours before putting it back in the fridge.

SIGNS OF A HEALTHY STARTER

**4.**

- Bubbling: Your starter should be bubbly and rise in size after each feeding.
- Sour Smell: A slightly tangy, vinegary smell is normal, indicating the presence of healthy bacteria.

5.

REVIVING A STARTER

- If your starter looks sluggish (not rising as usual or smelling off), increase feeding to twice a day for a few days. This usually revives it.
- Using rye flour to revive your sourdough starter can be very effective, as it contains more nutrients and enzymes that help promote yeast activity.

& OTHER HELPFUL INFORMATION

- Consistency: Aim for a pancake batter consistency. If it's too thick, add a bit more water.
- Cleaning: Clean your jar or container regularly to avoid any mold growth.
- By following these steps, you'll maintain a lively and healthy sourdough starter, ready for baking!
